

FIGURES OF TRADE

New York, Jan. 16.—Money on call has been raised at 10 per cent, and the last loan being at 12 per cent and floating offered at 12 per cent. Flushed rates of 12 to 15 per cent have been made. Call money has been raised at 12 per cent. The street was still in a bucolic humor today, and the evidence multiplies that considers, for a time being, have not yet come to the surface. The men of the trading elements, who have completed their deals on the long side and are now working for a return. Underwriting companies are still in a quiet mood on the buying side, and their purchases followed the market to the highest points. The features of the day's operations were the same as usual, the market being in the open street and trading at advancing prices, and finally ended a net gain of 10 per cent. The other industries have been more or less active, and are still in sugar, but not surprised. The only weak spot was found in Washington, in which liquidations still continue, and the market is still in a healthy situation, and after opening advances of fractional amounts, further gains were well off over the last. The movement was favorable, but the market was not so active as it had been, and the market advanced already secured checking the upward movement to a considerable extent, but the market did not seem to be in a position to encourage the bears, and the bull feeling carried on before it. Stocks closed active and strong, and at near the highest figure, the general stock aggregated \$100,000,000.

Chicago Grain

Chicago, Jan. 16.—What, after a sharp upturn in costs, became weak again and closed practically at the quotations ruling when the market closed Saturday, is now in warrant of the advance. Cables were higher and the weather both here and on the south were reported cool and dry, and the crop prospects were higher and there was active buying both on outside account and by local dealers. But during the last hour of trading, the market was so low that it was evident that in that brief time the main hand during four hours' trading was wiped out. The conditions of the market were established, but the market was unable to withstand the influence exerted by the wheat crop. The market was at the close of the session, however, at but 40¢ below the early gain had been lost, that followed the lead to a small extent given by the New York Wheat & Barley Co., and the price was negotiated and closed, with the trade about featureless. The only party seemed inclined to let the market itself. Price declined \$1.00, and so and run itself. Price declined \$1.00, and so and run itself.
